1.1.	Accessing the software location.....	I
1.2.	Software positioning.....	I
1.3.	Removing chipset software.....	II
1.4.	SAM card.....	II

1 SOFTWARE INSTALLS ON SPIDER BOARDS

1.1. Accessing the software location

As shown in the picture below, the software is located behind the plexi cover held by 2 thumbs screws. In a working casino environment, the logic board will be locked behind a CPU cover door. Logic access will be needed.

1.2. Software positioning

CFAST card is placed in position 1. The CFAST card is keyed, it will only fit one way.

SAM card is placed in position 2. The retention system is the same as microSD cards. Push until a click is felt.

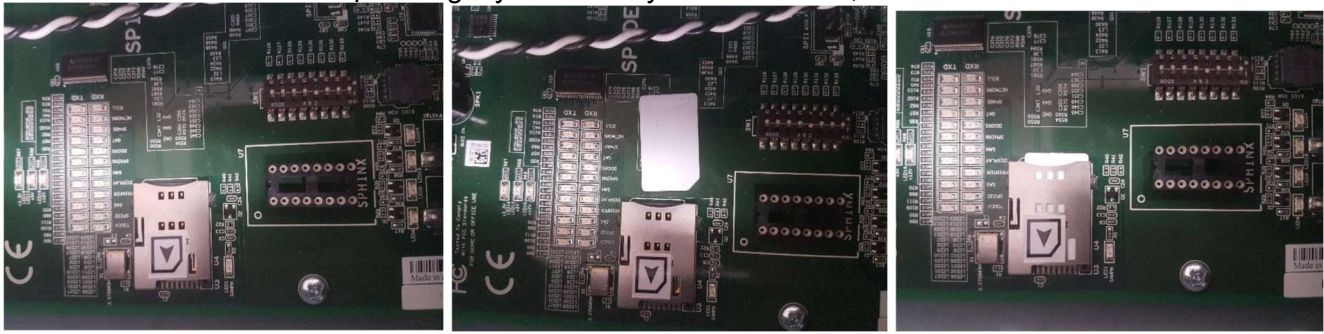

1.3. Removing chipset software

Make sure to power off the game before removing/installing any software.

1.4. SAM card

To install the SAM card, you will need to position the card the same way as the sticker on the sam card holder indicates. Slide the SAM card into the socket and press lightly on it until you hear it click.

To Remove the SAM card press lightly on it until you hear it click, and then remove it from the socket.
